SUMMARY

Software Engineer with 3+ years of experience designing and developing scalable backend services and RESTful APIs using Java, Spring Boot, and microservices architecture. Demonstrated proficiency in cloud application development across AWS and Red Hat OpenShift, leveraging Terraform and GitLab CI/CD automation. Proven track record of optimizing application performance by 50% and reducing code duplication by 30% through shared libraries and strategic caching.

SKILLS

Programming Languages & Frameworks: Java (Java 8+), Spring Boot, Node.js, Hibernate/JPA, Maven

Databases: PostgreSQL, SQL, NoSQL (Redis)

AWS: Lambda, API Gateway, EC2, ECS, EKS, VPC, S3, SQS, SNS, Route 53, IAM, OpenShift (ROSA)

DevOps: Docker, Kubernetes, Terraform, Scalr, GitLab CI/CD, Argo CD

Monitoring & Observability: Splunk, Dynatrace, CloudWatch, CloudTrail

Agentic AI: Claude, OpenCode

EXPERIENCE

Capgemini Technology Services
Associate Consultant

10/2023 – Present

- Developing **Claude** Skills integrated with **Model Context Protocol (MCP)** tools to automate engineering workflows, reducing manual effort.
- Building proof-of-concept implementations to validate agents prompt and output structure and enforce guardrails for responsible use of AI.
- Applying **AI-driven automation** to an active Spring Boot 4 migration, standardizing the upgrade across microservices.

Senior Software Engineer

- Developed secure, high-volume Spring Boot **REST APIs** and decoupled microservices using AWS **SQS** and Aurora **PostgreSQL**.
- Created internal TypeScript and Spring Boot libraries using Object-Oriented Programming (OOP) design patterns to centralize common code, reducing duplication across multiple projects.
- Managed cloud infrastructure provisioning using **Terraform**, automating deployments with GitLab CI/CD pipelines to drive operational efficiency.
- Optimized **Lambda** cold-start performance by bundling and minifying Node.js code with Webpack, reducing deployment package size and improving execution latency by **30%**.
- Engineered reusable **GitLab CI** Components to standardize pipelines for unit tests, security scans, and accelerating deployments.
- Managed **production support** and **incident resolution** by analyzing logs, metrics, and traces using CloudWatch, **Splunk**, CloudTrail, and **Dynatrace**.

Software Engineer

- Collaborated with leading U.S. Insurance client to transform legacy applications to modern, scalable architectures.
- Participated in cross-functional **Agile** team, facilitating sprint planning, backlog refinement, and continuous delivery.
- Executed Pivotal Cloud Foundry (PCF) to AWS (**ROSA**) cloud migration using Kubernetes manifests, securing applications with Entra ID and automated continuous delivery using **Argo CD**.
- Developed **serverless** applications using AWS Lambda integrated with **API Gateway** and **Redis** Cache to support highly efficient, event-driven workflows.

CERTIFICATES

AWS Certified Cloud Practitioner, AWS Certified Solutions Architect Associate, Claude Certified Architect Foundations

EDUCATION

Bachelor of Engineering, Anna University
CGPA - 8.5

09/2018 – 07/2022 | Chennai, Tamilnadu
